

Users of Quinton Marine Plasma consistently report better overall health, increased energy, improved stamina, quicker recovery after workout, crisp mental focus, and a whole host of benefits that might be considered unique to each user. That's because when internal balance is achieved, better health and performance is not far behind.

Recommended Use*

Dosage: 1 to 4 drinkable vials per day as recommended. Your practitioner may suggest you alternate between Isotonic & Hypertonic.
Instructions: Take Quinton on an empty stomach, 10 to 30 minutes before a meal or 2 hours after a meal. Hold Quinton in your mouth for 1 minute before swallowing.

Isotonic & Hypertonic – When To Use Each

Isotonic*: Diluted Seawater (0.9% salinity)
Excellent for yoga, meditation, sleep, and recovery after exercise.
Yin, Cooling, Calming, Balancing. Mental focus.
Balances skin conditions, digestive issues, nervous or anxious states.
Reduces hypersensitivities to foods and other allergens.
Reduces inflammatory cycle.

Hypertonic*: Undiluted Seawater (3.3% salinity)
Excellent for high performance, and intense mental activity.
Energizing, Replenishing, Building, Tonifying.
Improves endurance and strength.
Excellent for colds, flu, and other infections
Ideal to support recovery from fatigue, low energy, and other depressive states.
Reduces inflammatory cycle.

Quality

Quinton is backed by 100 years of safety. Only Quinton marine plasma meets European pharmaceutical manufacturing standards. Quinton is never heated, exposed to UV light, or radiation.

Suggested Retail: \$75 per box (24 glass vials)
\$19.95 per box (6 glass vials)

Carlos Burle – World Champion Surfer Says “Quinton Gives Me The Focus I Need To Stay On Top”

Carlos Burle, World Champion Big Wave Surfer, spends his days drenched by the ocean, yet he still chooses to drink Quinton from a little glass vial. On Quinton, Carlos reports better mental focus and increased endurance. Seawater alone does not deliver the results that Quinton does.

QUINTON™ MARINE PLASMA

SINCE 1897

Complex of 84 Seawater Electrolytes
Micro-enzyme Catalysts
Pre-Biotic Complex
Marine Co-Factors

Quinton™ Marine Plasma: Beyond Seawater

Under specific life-incubating conditions, enormous vortex plankton blooms form in the open ocean. The vortex movement stirs up nutrients from the bottom of the ocean floor that in turn feeds the plankton and the sea life they support.

In this unique ocean oasis, high concentrations of microscopic sea-life act as virtual factories that turn out a “soup of life”. For example, vortex plankton blooms produce more vegetation than all the vegetation on land. In turn, these plankton blooms are consumed by trillions of zooplankton that secrete a viscous living fluid of marine nutrients.

In 1897, René Quinton discovered that this “marine plasma” had the ability to restore the quality of our internal fluids. Quinton replenishes the 84 minerals your body needs, and “feeds” the healthy bacteria and enzymes found within our internal “ocean” with marine co-factors.

The first living organisms originated within the oceans, with each cell being bathed in seawater. Our bodies have recreated our own internal ocean that feeds our cells. In fact, our internal ocean contains the same ‘organic’ trace minerals found in the sea at a ratio and proportion that is similar to that of the ocean.

What can Quinton™ do for You?*

Health Benefits Include:
Increases energy, endurance, and focus
Improves digestion and elimination
Reduces the inflammatory cycle
Promotes deep rest and physical recovery
Calms nervous tension and stress

Plankton Bloom
(100 miles across)

Plankton-Free Quinton is cold filtered to remove all plankton and microorganisms leaving behind a pure nutrient rich fluid.

Quinton™ Contains Organic Nutrients - Transformed by Living Zoo-Plankton

We have all bought a mineral supplement at some point. Ever wonder how that “rock” gets absorbed into the body?

That “rock” contains inorganic minerals that must first be converted by healthy “gut” bacteria in order to be absorbed. Much of that “rock” simply leaves the body as fast as it came in or worse sticks around congesting the internal organs. Within the plankton bloom, plankton transform *inorganic* minerals found in the sea to their *organic* state.

Trace minerals produced from salt beds on land are inorganic, because they have not been pre-digested by living zooplankton. When both land and sea salts are dried, the once organic minerals are converted back to their inorganic states, limiting bioavailability.

Our Land-Locked Bodies Are Nutrient Starved

Living off of the land no longer provides the nutrients needed to maintain our internal ocean. Our land-locked bodies are nutritionally starved.

The soil that grows the foods we eat no longer has the full spectrum of trace minerals we crave. We overeat in a futile attempt to restore this fundamental “organic” mineral balance.

Every cell in the human body gets its food from its own internal ocean, the extra-cellular fluid surrounding our cells. In this surrounding fluid, there must be a perfect balance of all major and trace minerals in order for our cells to effectively communicate with each other. Quinton marine plasma restores balance to your internal fluids.

Quinton™: Evolving Our Potential

As a result of life’s seawater origins, our biochemistry and physiology resonate strongly with oceanic chemistry. In fact, the relative balance of minerals in Quinton Marine Plasma is nearly identical to that of human blood plasma.

Quinton’s effects are not just the result of organic trace minerals. In recent years, it has been established that nutritional factors profoundly influence our genetic expression.

When we take a closer look, we see that ocean water contains a “soup” of over 20 billion genes, which circulate through all life in the ocean. (Source: J. Craig Venter)

Microscopic life forms in the ocean digest and recycle this genetic information in order to support the emergence of new life. Quinton™ Marine Plasma is the substrate from which all new life in the ocean emerges.

Indeed, our immune system is a dynamic network, like a secondary brain, which is constantly adapting to new information from its environment. Scientists believe that marine plasma may work to upgrade the immune system, similar to how anti-virus programs defend computers from viral attacks.

Who was René Quinton (1866-1925)

René Quinton was a French physiologist, biologist, humanitarian, aviator, explorer, inventor, and World War I hero – a true Renaissance Man. He uncovered through years of oceanic exploration and observation that unique vortex plankton blooms spontaneously birthed new oceanic life.

Quinton’s investigation and insights culminated in the timeless discovery that seawater was the “blood” of the ocean - and that plankton bloom seawater (“marine plasma”) was the “womb” from which new ocean life emerged. He theorized that this marine plasma could “renew” the internal ocean within us. Quinton then applied marine plasma clinically and in turn brought to humanity one of the greatest known “elixirs” ever discovered to support optimal health and restore biological terrain.

René Quinton and his family funded over 69 free clinics throughout Europe that administered Quinton™ to those in need. Quinton marine plasma was so effective that it was recognized as a pharmaceutical drug for over 60 years and was featured in the *Dictionnaire Vidal*, France’s equivalent of the *Physicians Desk Reference* (PDR) until 1999.

Increased Energy & Endurance

A subjective outcome-based clinical study was conducted in 2002 by Dr. Marc François Paya, Professor at The University of Paris XIII, and Fellow of the Academy of Sciences of New York. Amateur cyclists evaluated their performance over a period of 30 days while taking four (4) vials of Quinton Hypertonic Marine Plasma daily. The following provides a summary of their subjective improvements.

Observed Parameters	% Improvement
Physical Recuperation	↑60
Nervous Tension	↓43
Acceleration	↑36
Ability to Climb Hills	↑75
Physical Endurance	↑34

Benefits

Think of the internal fluids of your body as your own “internal ocean.” By replenishing your original fluid balance with Quinton, your “ocean” works better – similar to how soil needs minerals, enzymes, and healthy bacteria in order to support new life.
